

Approaching a CARE CONVERSATION

There is no
single way to
have a
conversation.

Different
approaches
work better for
different people.

No one gets
these
conversations
perfectly right.

Making time to learn more is a great start.

A

Create a **safe space** with
no distractions.

B

Stay connected with **open
body language** and a
gentle tone.

C

Take time to **learn**
appropriate **safe language**.
